SAIKRISHNA GARIKIPATI

Systems Engineer Expert | Distributed Systems & AI-Augmented Engineering

Austin, TX | 361-355-5737 | garikipatisai@gmail.com
LinkedIn: linkedin.com/in/saikrishna-garikipati-b8655016b
Portfolio: saikrishnajava.github.io/portfolio/

PROFESSIONAL SUMMARY

Systems engineer and technology architect with 10+ years of experience designing distributed, event-driven enterprise platforms across financial services, technology, and healthcare. Expertise in Java, Spring Boot, Kafka, Kubernetes, AWS, microservices, and production reliability. Combines architecture leadership and hands-on delivery with AI-augmented engineering using Claude, RooCode, MCP integrations, semantic retrieval, and agent-based orchestration.

TECHNICAL SKILLS

Architecture: Distributed systems, microservices, event-driven architecture, domain-driven design, REST/GraphQL APIs, resiliency, sidecar patterns, performance tuning

Backend & Data: Java 21/17/11/8, Spring Boot, Spring Cloud, WebFlux, JPA/Hibernate, Kafka, CDC, SQL, Oracle, CockroachDB, DynamoDB, MongoDB, PostgreSQL

Cloud & Delivery: AWS, EKS, EC2, S3, Lambda, Docker, Kubernetes, OpenShift, Jenkins, GitHub Actions, Git, Maven, JUnit, Mockito, Linux, ELK

AI & Frontend: Claude, RooCode, MCP, RAG, Qdrant, vector databases, semantic search, AI guardrails, agent orchestration, React, Redux, Angular, TypeScript, Python

PROFESSIONAL EXPERIENCE

Charles Schwab | Austin, TX

Systems Engineer Expert | AI Augmentation | Jul 2026 - Present

- Focus on large-scale distributed systems, cloud-native platforms, and AI-augmented development architectures supporting mission-critical enterprise workloads.

Apple | Austin, TX

Technology Architect | Mar 2025 - Jul 2026

Senior Lead Software Engineer | Aug 2024 - Mar 2025

- Led Java/Spring Boot microservice architecture and delivery for enterprise streaming, data transformation, and integration workflows using Kafka and Kubernetes.
- Led Agile PLM-to-Siemens Teamcenter migration and built Kafka-driven integration pipelines for file transformation and product-data synchronization with Oracle and CockroachDB.
- Designed CockroachDB change-feed-based cache refresh, sidecar services, and REST APIs; optimized critical code paths and reduced API response time from 800 ms to 350 ms.
- Implemented Qdrant semantic retrieval and guardrails; built Claude-integrated toolchains connecting external APIs, databases, and modular agent workflows.
- Applied RooCode, Claude, and MCP-based tooling to architecture validation, code analysis, refactoring, and test creation while retaining human review for correctness and security.
- Mentored seven engineers and strengthened code reviews and incident troubleshooting; reduced average incident recovery time from 2.5 hours to 45 minutes.

PROFESSIONAL EXPERIENCE - CONTINUED

Fiserv | Berkeley Heights, NJ

Lead Software Development Engineer | May 2023 - Jul 2024

- Led monolith-to-microservices migration on Red Hat OpenShift, reducing deployment time from four hours to 12 minutes through containerization and continuous delivery.
- Designed multi-zone OpenShift architecture with service mesh and autoscaling; built resilient data platforms using Amazon RDS, DynamoDB, and S3.
- Delivered full-stack modernization using MongoDB, React/Redux, Node.js, and GraphQL; improved API responsiveness and maintainability.
- Led distributed-team code reviews, mentored engineers, and automated Linux deployment, monitoring, and log aggregation with shell scripts.

Zions Bancorporation | Salt Lake City, UT

Java Full Stack Developer | Jun 2021 - May 2023

- Architected reactive GraphQL services with Spring Boot, WebFlux, and Project Reactor for enterprise Data-as-a-Service and cross-application synchronization.
- Built REST microservices and Kafka event flows for near-real-time transactional data; implemented DynamoDB indexes and stream processing for high-volume workloads.
- Optimized database queries, indexing, and connection pooling; improved transaction throughput from 5,000 to 15,000 transactions per second.
- Delivered AWS/Kubernetes infrastructure and shell-based deployment automation; collaborated through Azure DevOps, Git, and Agile delivery practices.

Comerica Bank | Auburn Hills, MI

Lead Java/J2EE Developer | Apr 2020 - May 2021

- Led five developers delivering Java/J2EE banking applications and increased release frequency from monthly to biweekly.
- Designed ESB integrations between core banking and digital channels; migrated monolithic applications to Spring-based microservices.
- Designed multi-tenant relational schemas, optimized transaction queries, and mentored developers through architecture and code reviews.

Blue Cross and Blue Shield (IL, MT, NM, OK & TX) | Richardson, TX

Software Engineer | Mar 2018 - Mar 2020

- Designed Spring Boot claims-processing microservices and REST integrations with downstream enterprise systems.
- Reduced report generation time from 45 minutes to eight minutes through query tuning and indexing; developed JUnit/Mockito automated tests.

PLLC Software Solutions | Rajahmundry, India

Java Developer | Apr 2014 - Dec 2015

- Built Java/Spring ERP modules for inventory, procurement, and finance; implemented REST integrations and optimized database queries.

EDUCATION

Master of Science, Computer Science | Texas A&M University-Kingsville | 2017

Bachelor of Engineering, Computer Science | Rajamahendri Institute of Engineering & Technology | 2015

CERTIFICATION

Career Essentials in Software Development | Microsoft and LinkedIn | 2024
